Resident Halkirk 2 Wind Project

AUC Rule 7 Engage Review Viewscapes.

Attn: Laura Johnson AUC

Alberta Utilities Commission:

I am a resident of the County of Paintearth, home of four Wind Projects and two more in the planning stages. I have been involved with and live within the Halkirk 2 Wind Project. I have witnessed and worked with several residents forced from their homes due to miss information and false information filed with the AUC by developers. The AUC has rejected all concerns put forward by residents regarding Viewscapes and health. This has led to the forced relocation and abandonment of several residents' homes and yard sites. Proof and pictures attached.

My recommendation for Rule 007 Engage.

If a developer files information or presents information that contradicts residential concerns and causes any health-related problems whether physical or mental the developer will immediately cease all Project Turbine operations and address residents' concerns. This may involve Turbine Removal or Resident relocation at the Developers cost. This must be supported by AUC Enforcement with a firm resolution with in 60 days.

We as a community have witnessed six forced family relocations in the Halkirk 1 and 2 Wind Project with no recourse for Residents. Developers and the AUC have done nothing to support residents. Residents have been forced to cover all cost and have suffered financial and mental health related concerns. These concerns have led to family breakups and death as an only escape. We must protect and prevent this imposed punishment on Alberta's Rural Residents.

Please submit my concerns and recommendations as part of the Rule 007 Engagement.

Thank You

Respectfully
