Dear Ms. Frank,

**Re: Bulletin 2025-02, AUC Rule 007 Consultation
Alberta Electric System Operator (AESO) Comments**

On March 24, 2025, the Alberta Utilities Commission (AUC) issued Bulletin 2025-02, seeking feedback on the draft blackline version of Rule 007: *Facility Applications*, the rule formerly known as Rule 007: *Application for Power Plants, Substations, Transmission Lines, Industrial System Designations, Hydro Developments, and Gas Utility Pipelines*.

The AESO has conducted a review of the draft blackline version of Rule 007: *Facility Applications* and appreciates the opportunity to present comments. The proposed modification is designed to clarify the requirement for market participants to inform the AESO of any change in the capability of a power plant or energy storage facility.

Reference	Draft Blackline Language	AESO Proposed Change	Rationale
Tables 4.2, 4.6, 4.8, 4.10, 4.12, 10.2 "Total capability of power plant/energy storage facility in MW"	If the decrease is more than 10 percent, confirm that the ISO has no concerns with the change.	If the decrease is more than 10 percent, Confirm that the ISO has no concerns with the change.	Market participants are required to provide accurate information to the AESO about any changes to facility capability.

The AESO thanks the Commission for the opportunity to provide comments on Rule 007: *Facility Applications* and is available to explain our proposed change should that be required.

Please contact the undersigned if you have any questions.

Sincerely,

<electronically submitted>

Jodi Marshall
Director, Law (Grid)
