Instructions:

1. Please review [Bulletin 2026-12](#).
2. Please download this document, save as “**Rules 021 and 028 feedback on draft amendments [name of company or individual]**.”
3. Fill out the contact information above and provide your responses to the questions within the indicated fields below.
4. Submit your response to engage@auc.ab.ca. In the email, please include the following subject line: **Rules 021 and 028 engagement**.

Rule 021: Settlement System Code Rules questions

Content	Response
Please review the draft Rule amendments in full. Do you have any concerns about how the draft amendments are currently written? If so, suggest revised or additional wording accordingly.	With respect to the amendments specifically related to the implementation of Alberta Time, the AESO has no concerns with the amendments as currently drafted and agrees with the proposed changes.
Please review the draft Rule amendments in full. Are there additional sections that you think require changes to affect Alberta time? If so, please identify those sections, and propose amendments to those sections.	With respect to changes specifically required to implement Alberta Time, the AESO has not identified any additional sections that require amendments. The AESO agrees with the amendments as currently drafted.
If you have additional comments or would like to provide additional context to the AUC in relation to the draft Rule amendments, please provide it here.	The AESO has identified several suggested amendments to the draft Rule that are not related to the implementation of Alberta Time. The AESO provides the following comments and proposed changes for the AUC's consideration. Section 1.1 (Key Terms). Measurement Point The AESO recommends replacing the current definition of "Measurement point":

Rule 021: Settlement System Code Rules questions

Content	Response
	“Measurement point has the meaning ascribed to the term ‘measurement point’ as defined by ISO in its Alberta Electric System Operator Measurement System Standard.” with: “Measurement point has the meaning ascribed to the term ‘measurement point’ as defined by ISO in its Alberta Electric System Operator Consolidated Authoritative Document Glossary.” Measurement Point Definition Record (MPDR) The AESO recommends replacing the current definition of “Measurement point definition record”: “Measurement point definition record has the meaning ascribed to the term ‘measurement point definition record’ as defined by ISO in its Alberta System Operator Measurement System Standard.” with: “Measurement point definition record has the meaning ascribed to the term ‘measurement point definition record’ as defined by ISO in its Alberta Electric System Operator Consolidated Authoritative Document Glossary.” Metering Point The AESO recommends replacing the current definition of “Metering point”: “Metering point has the meaning ascribed to the term ‘metering point’ as defined by the ISO in its Alberta Electric System Operator Measurement System Standard.” with: “Metering point has the meaning ascribed to the term ‘metering point’ as defined by the ISO in its Alberta Electric System Operator Consolidated Authoritative Document Glossary.” These changes would align the definitions with the terminology and references used in the AESO’s Consolidated Authoritative Document Glossary. Section 10.2 (6). The AESO recommends replacing the current wording: “All system-level interval metering points must be in compliance with the ISO Measurement System Standard for installation and testing purposes.” with:

Rule 021: Settlement System Code Rules questions

Content	Response
	"All system-level interval metering points must be in compliance with Section 503.17 of the ISO Rules (Revenue Metering System) for installation and testing purposes." Table A-5. The AESO recommends updating Table A-5, "Meter Data Manager (MDM) ID," to reflect current active and inactive MDMs. The AESO recommends adding expiry date for the following MDMs: • MDM: Trakflow • Expiry Date: February 7, 2022 • MDM: R. Braun Contracting Ltd. • Expiry Date: February 7, 2022 The AESO also recommends adding the following new MDM to table A-5: • MDM: Renegade Metering Corp. • MDM ID: 2220 • Effective Date: June 24, 2026

Rule 028: Natural Gas Settlement System Code Rules questions
