The AUC's eFiling System 2.0 is now live

The AUC is pleased to announce the launch of eFiling System 2.0.

The project, commenced in early 2024, included rebuilding the existing system using modern software and architecture to ensure its reliability, security and performance. The modernized platform contains a new interface offering a fresh design, improved responsiveness and mobile friendly functionality.

To highlight and explain the new interface, the AUC has prepared [brief video demonstrations](#) and an updated [eFiling System User Guide](#). More resources related to the eFiling System can be found on the [How to use the eFiling System](#) web page.

Users can still access the eFiling System from the www2.auc.ab.ca home page. However, existing bookmarks or emailed links to the current eFiling System will no longer function.
