24-month application forecast for 2026-2027

The [24-month application forecast for 2026-2027](#) is now publicly available on the AUC website. Each year the AUC requests application forecast information from regulated entities to assist the AUC and other stakeholders with their planning for the upcoming two years. Feedback is received and consolidated into the 24-month application forecast spreadsheet.

Applications are organized by applicant and by type (i.e., rates, facilities, need, independent system operator rules, reliability standards, franchise applications, code exemptions, code plan changes, and other).

Questions about the application forecast can be sent to info@auc.ab.ca.
