## **Updated distribution system planning reporting template for AUC-regulated electric distribution facility owners**

On March 3, 2026, the Alberta Utilities Commission (AUC), issued [Bulletin 2026-02](#), introducing distribution system planning reporting guidelines for FortisAlberta Inc. and the distribution businesses of ENMAX Power Corporation, EPCOR Distribution & Transmission Inc. and ATCO Electric Ltd. (collectively, electric distribution utilities).

Following an information session on April 28, 2026, the AUC has updated the distribution system planning reporting template to reflect feedback and discussion from participating utilities.

### **Summary of updates**

The updated template includes refinements to improve clarity, consistency and usability, including:

- Updates to data requirements across select tabs (e.g., load forecast and investment plan).
- Clarifications to instructions for reporting utilization metrics.
- Minor adjustments to efficiency and reliability reporting, including units and calculation guidance.

The updated distribution system planning template was shared with the electric distribution utilities on May 18, 2026.

To ensure stakeholders are accessing the most current version, hyperlinks in [Bulletin 2026-02](#) have been updated.

### **Additional information**

Questions about the distribution system planning initiative may be directed to Elena Deryabina [elena.deryabina@auc.ab.ca](mailto:elena.deryabina@auc.ab.ca). General questions can be directed to [info@auc.ab.ca](mailto:info@auc.ab.ca).
