

eFiling System Updates

Release 2.00.05

May 10, 2025

ID	Title	Description
644	Find Applications date range filter	In the Find applications screen, the Date Type: "Decided" filter is fixed, returning results for migrated data.
770	Proceeding home screen mobile display issues	Name and email contact on the proceeding home screen are fixed to fully display in mobile devices.
773	Application record display issue	Data in the Location column in the Application(s) screen is fixed and displaying correctly.
774	Registered party name display issue	Column adjustments are made to the Registered party details screen to ensure longer names are fully displayed in the contact columns.
775	Legal land description update issue	The Registered parties screen legal land description field is fixed to update the data displayed when the associated data is edited in the SIP form.
777	Add applicant screen icon display issue	When adding a new applicant, the secondary contact field is fixed to only display the removal icon when a contact is populated.
778	External website not displaying disposition corrigenda updates	When a corrigenda is released, the previous disposition document is automatically voided and removed from the external website. The new disposition document (corrigenda) is now correctly displayed on the external website in place of the voided document.
780	Application details screen display inconsistency	The Applicants tab height is adjusted for formatting consistency.
781	SIP form formatting inconsistencies	Formatting adjustments are made to the SIP form checkboxes when viewed in a mobile device.
796	Date range not returning last day results	The date range feature available in all Find and My screens is now fixed to return results for the last day of the date range dates.
802	Notice of restructure grammar edits	Minor grammar corrections have been made to the system-generated Filing announcement - proceeding restructure document.
805	Mobile display issue	The select arrow column in the Select a filing type window is adjusted to fully display in smaller devices.
806	Motion for confidentiality available in error for group representatives	User permissions are fixed to prevent a group representative from being allowed to create the filing type: Motion for confidentiality on behalf of the group. Additionally, group representatives also representing registered interveners in the same proceeding no longer receive error messages when visiting the Documents screen, Confidential motion tab.
808	Registering confidential transcript timeout	A timeout error is fixed when registering confidential transcripts.

811	Restricted proceeding document revision registration error	A system error preventing the registration of revised documents for confidential filing types in restricted proceedings is fixed.
