eFiling System Updates
Release 2.01.00
September 13, 2025

ID	Title	Description
854	Error opening documents in new tab	When users right-click on the name of a filing or application document, the "Open link in new tab" option is now restored.
858	Confidential permissions not updating	Confidential permissions are now updated and enforced when an organizational user's confidential administrator status is changed, or their account is inactivated.
864	Applicants screen not updating contact edits	When an external user's contact information is updated, the change is now captured in the user's contact call out card in the Applicants screen.
868	Document Index upgrades	New features are added to the Document Index to improve usability and accessibility. When selecting the Document Index action button (Documents screen), a drop-down menu control allows users to change the default html format to csv. Both the html and csv formats include a new column with the URL for the respective eFiling document. As records change, users will need to download a new csv index and perform a manual comparison with their previous file to decide how to merge updated details.
870	Updated privacy statements	To ensure external users are fully informed of the AUC's privacy policy, privacy statements are updated across key areas of the eFiling system. These updates prompt users to acknowledge and accept the AUC's privacy policy, which is available on the https://www.auc.ab.ca. The updated privacy disclaimers appear in the following locations: Single user account creation New organization account form Email sent to new organizational users with their temporary password Proceeding Documents screen when using the "Zip & download" function
875	Procedural filing - motion schedule and filing type disconnected	A disconnect between the schedule and filing type Procedural filing – motion has been restored. When in-progress, the schedule type is now available for users to associate the corresponding filing too. The schedule type is optional, it does not prevent users from registering the Procedural filing - motion filing type.
879	Confidentiality undertaking restriction notification	The system prevents parties from creating multiple draft Confidentiality undertakings for the same disclosing party within a proceeding. A notification is now generated informing the user of this restriction and guides them on how to proceed. In addition, a bug is fixed where the status for Confidential undertaking filings is bypassing the Draft status for single users.
881	Account lock indicator added	A new tag is added to the user profile screen to indicate whether the account is locked.

882	Find applications - filtering issue	A filtering issue is resolved that previously prevented valid applications from appearing in search results when using the consolidated view for Facilties applications.
886	Public summary document replacement upload failing	Public summary replacement documents within the 50MB upload threshold are no longer failing to upload.
