eFiling System Updates
Release 2.01.01
October 11, 2025

ID	Title	Description
892	Zip and download index has no View document link	After a zip and download, when the user extracts the zip and opens the index file, the user is not able to open the document on eFiling with the View document column - the link does not exist.
895	Direction notification bug	When associating an application document to a direction on a new proceeding, the generated notification reports the wrong organization.
896	Mailing list application document type - internal only for privacy concerns	Application documents of the application document type 'Mailing list' are very likely to contain personal information of individuals, and will from now on have a default status of 'Internal only'. This will allow only AUC staff to view these documents.
897	Exhibit numbering was not in the filed order	On confidential proceedings, documents uploaded in alphanumeric order do not necessarily receive exhibit numbers in that default order.
