

eFiling System Updates

Release 2.01.03

March 14, 2026

ID	Title	Description
981	Enhanced login security	External user sign in may now require hCaptcha verification to help protect accounts from automated and fraudulent login attempts by requiring the user to verify they are human . This security enhancement helps safeguard information while minimizing disruption to normal access.
642	Filter tool	The filter tool is added to select columns across several areas of the system. The filter icon will be visible in certain columns within: Find screens, Documents screen, Application details screen, and Filing details screen.
910	PDFs failing to display on mobile browsers	In some browsers, PDF documents may not open in a new tab due to pop up blocking settings. When this occurs, eFiling now displays a message instructing users to disable pop up blocking in their browser settings.
922	Updates to draft filing details screen	The following updates are made to the draft Filing details screen. - A banner will appear indicating the filing is not yet registered. - The draft filings tab will show the number of drafts in brackets.
926	Sync external hearing calendar with eFiling	The external hearings calendar is now synced with eFiling, automatically populating hearing related events as schedules are created in eFiling.
928	Draft filing Late status not updating	The Late status for existing draft filings is fixed to now update to a Yes status when the corresponding schedule reaches its closing date.
929	Error viewing draft confidential documents	Draft confidential documents are no longer generating errors and failing to open for authorized users.
931	Facilities application forms missing contact information for AUC notices	Facilities energy storage application forms are updated to require applicant contact information for use in AUC notices.
932	Draft proceedings failing to delete	Automatic system deletion of draft proceedings that exceed the 180-day retention period is restored.
937	New application document type and screen messages	A new application document type for cover letters is added to the system. Additionally, messages are added to the document type selector window and the uploader screen to encourage external users to select the appropriate document type for their application documents and better understand how exhibit number assignments are affected by the order of uploaded documents.
942	Display file size	The Filing details and Documents screens are updated with a new column displaying file size.
945	Document index availability	Permissions are restored to allow authorized users to generate a document index in HTML and CSV formats on completed proceedings.
949	Directions screen pagination display	The Directions screen is fixed to display correct paging information. For example: Page 1 of 4 (total 30 directions).

950	Directions satisfied via new proceeding error	The link to select directions to map to an application document from the Uploader screen is restored and new proceedings satisfying directions are no longer failing to register.
956	Related proceedings descendant list	The Related proceedings feature available from the proceeding's home screen is fixed to populate all descendant proceedings of the directly related proceedings.
960	Upload not available for Confidentiality Undertaking	An issue has been resolved that affected external registered parties creating a draft Confidentiality undertaking in a completed confidential proceeding. Previously, after creating a draft, the Upload, Register, and Delete filing options were not available. This has now been corrected.
977	Unauthorized users able to view restricted filings	The search logic in the Find filings screen is updated to ensure restricted filings are excluded from being listed in result sets for unauthorized users.
979	Find Proceedings party filter failing to refresh results	Search results now update correctly when a party name is cleared from the filter using the "X" function.
985	Find applications consolidated filter not being removed after clearing division field	Clearing the division filter now correctly resets the results list when using the consolidated feature in the Find applications screen.
987	Right click and open in new tab issues	An issue has been fixed where using right click > Open in new tab did not work as expected for certain documents. Previously, opening Word documents in a new tab redirected users to the Search screen and was not functional for regulatory documents. This functionality has now been restored. Documents now open correctly in a new browser tab.
990	Find proceedings missing hearing schedules	The Hearing start date column in the Find proceedings screen is updated to display the start date and time for schedule types: Hearing - oral argument and Hearing -oral reply argument .
